MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 40 (1987)

Age, atherosclerosis, lymphocyte receptors, theophylline, 1
Ageing. catalase, antioxidant, sodium hypophosphite, *Zaprionus paravittiger,* 139
Ageing, natural killer cells, suppression, mice, 57
Ageing, oxygen toxicity, human diploid fibroblasts, colony formation, DNA synthesis, 81
Aging, alkaline elution, chondrocytes, DNA repair, UV endonuclease-sensitive sites, 193
Aging, chondrocyte, DNA repair, methyltransferase, 205
Aging, enzyme induction, *Aspergillus ornatus,* tryptophan, *o*-pyrocatechuic acid carboxylyase, 31
Aging, human T lymphocytes, mitogenic response, individual variability, repeated determination, 71
Aging, Langendorff isolated perfused heart, reoxygenation, myocardial contracture, iodoacetate, glycogen, 41
Aging, lipid, cell membrane, immune responsiveness, 131
Aging, oxidative stress, free radicals, glutathione, redox status, insects, 171
Aging, parathyroid hormone stimulated ionic fluxes, rat, parotid cell, 215
Aging, skeletal muscle, motor unit, contractile properties, rat, 243
Aging, T cell, flow cytometry, surface antigen, 89
Aldehyde dehydrogenase, isozymes, liver, kidney, stomach, ontogeny, mouse, 103
Alkaline elution, aging, chondrocytes, DNA repair, UV endonuclease-sensitive sites, 193
Antioxidant, catalase, sodium hypophosphite, ageing, *Zaprionus paravittiger,* 39
Aspergillus ornatus, aging, enzyme induction, tryptophan, *o*-pyrocatechuic acid carboxylyase, 31
Atherosclerosis, age, lymphocyte receptors, theophylline, 1
Catalase, antioxidant, sodium hypophosphite, ageing, *Zaprionus paravittiger,* 139
Cell membrane, lipid, aging, immune responsiveness, 131
Chondrocyte, aging, DNA repair, methyltransferase, 205
Chondrocytes, aging, alkaline elution, DNA repair, UV endonuclease-sensitive sites, 193
Collagen, mechanical properties, maturation, rat tail tendon, 9
Colony formation, ageing, oxygen toxicity, human diploid fibroblasts, DNA synthesis, 81
Computer analysis, synaptonemal complexes, telomeric associations, pachytene, 115
Contractile properties, aging, skeletal muscle, motor unit, rat, 243
Crown gall, senescence, polyamines, cytokinin, nucleases, 17
Cytokinin, senescence, polyamines, crown gall, nucleases, 17

DNA repair, aging, alkaline elution, chondrocytes, UV endonuclease-sensitive sites, 193
DNA repair, aging, chondrocyte, methyltransferase, 205
DNA synthesis, ageing, oxygen toxicity, human diploid fibroblasts, colony formation, 81

Enzyme aging, rat muscle, oxidation, free radicals, 289
Enzyme induction, aging, *Aspergillus ornatus,* tryptophan, *o*-pyrocatechuic acid carboxylyase, 31

Fatty acids, glucose, galactose, leucine, low cholesterol diet, 157
Flow cytometry, low density lipoproteins, fluorescence, aging, lymphocyte, 261
Flow cytometry, T cell, aging, surface antigen, 89
Fluorescence, low density lipoproteins, aging, lymphocyte, flow cytometry, 261

Free radicals, aging, oxidative stress, glutathione, redox status, insects, 171
Free radicals, rat muscle, enzyme aging, oxidation, 289
Friend virus, virus replication and aging, 181

Galactose, glucose, leucine, fatty acids, low cholesterol diet, 157
Gamma distribution raised to combinatoric power, new stochastic human death function, small integers, power law, preliminary studies, 223
Glucose, galactose, leucine, fatty acids, low cholesterol diet, 157
Glutathione, aging, oxidative stress, free radicals, redox status, insects, 171
Glycogen, Langendorff isolated perfused heart, reoxygenation, myocardial contracture, iodoacetate, aging, 41

Human diploid fibroblasts, ageing, oxygen toxicity, colony formation, DNA synthesis, 81
Human T lymphocytes, aging, mitogenic response, individual variability, repeated determination, 71

Immune responsiveness, lipid, cell membrane, aging, 131
Individual variability, aging, human T lymphoyctes, mitogenic response, repeated determination, 71
Insects, aging, oxidative stress, free radicals, glutathione, redox status, 171
Iodoacetate, Langendorff isolated perfused heart, reoxygenation, myocardial contracture, glycogen, aging, 41
Isozymes, aldehyde dehydrogenase, liver, kidney, stomach, ontogeny, mouse, 103

Kidney, aldehyde dehydrogenase, isozymes, liver, stomach, ontogeny, mouse, 103

Langendorff isolated perfused heart, reoxygenation, myocardial contracture, iodoacetate, glycogen, aging, 41
Leucine, glucose, galactose, fatty acids, low cholesterol diet, 157
Lipid, cell membrane, aging, immune responsiveness, 131
Liver, aldehyde dehydrogenase, isozymes, kidney, stomach, ontogeny, mouse, 103
Liver development, lysosomal apparatus, lysosomal development, phosphomannose receptors, receptor development, 149
Low cholesterol diet, glucose, galactose, leucine, fatty acids, 157
Low density lipoproteins, fluorescence, aging, lymphocyte, flow cytometry, 261
Lymphocyte, low density lipoproteins, fluorescence, aging, flow cytometry, 261
Lymphocyte receptors, age, atherosclerosis, theophylline, 1
Lysosomal apparatus, lysosomal development, phosphomannose receptors, liver development, receptor development, 149
Lysosomal development, lysosomal apparatus, phosphomannose receptors, liver develop-m,ent, receptor development, 149

Maturation, collagen, mechanical properties, rat tail tendon, 9
Mechanical properties, collagen, maturation, rat tail tendon, 9
Methyltransferase, aging, chondrocyte, DNA repair, 205
Mice, natural killer cells, suppression, ageing, 57
Mitogenic response, aging, human T lymphocytes, individual variability, repeated determination, 71
Motor unit, aging, skeletal muscle, contractile properties, rat, 243
Mouse, aldehyde dehydrogenase, isozymes, liver, kidney, stomach, ontogeny, 103
Myocardial contracture, Langendorff isolated perfused heart, reoxygenation, iodoacetate, glycogen, aging, 41

Natural killer cells, suppression, ageing, mice, 57
New stochastic human death function, small integers, power low, gamma distribution raised to combinatoric power, preliminary studies, 223
Nucleases, senescence, polyamines, cytokinin, crown gall, 17

Ontogeny, aldehyde dehydrogenase, isozymes, liver, kidney, stomach, mouse, 103
Oxidation, rat muscle, enzyme aging, free radicals, 289
Oxidative stress, aging, free radicals, glutathione, redox status, insects, 171
Oxygen toxicity, ageing, human diploid fibroblasts, colony formation, DNA synthesis, 81

Pachytene, synaptonemal complexes, telomeric associations, computer analysis, 115

Parathyroid hormone stimulated ionic fluxes, rat, parotid cell, aging, 215
Parotid cell, parathyroid hormone stimulated ionic fluxes, rat, aging, 215
Phosphomannose receptors, lysosomal apparatus, lysosomal development, liver development, receptor development, 149
Polyamines, senescence, cytokinin, crown gall, nucleases, 17
Power law, new stochastic human death function, small integers, gamma distribution raised to combinatoric power, preliminary studies, 223
Preliminary studes, new stochastic human death function, small integers, power law, gamma distribution raised to combinatoric power, 223
o-Pyrocatechuic acid carboxylyase, aging, enzyme induction, *Aspergillus ornatus,* tryptophan, 31

Rat, aging, skeletal muscle, motor unit, contractile properties, 243
Rat, parathyroid hormone stimulated ionic fluxes, parotid cell, aging, 215
Rat muscle, enzyme aging, oxidation, free radicals, 289
Rat tail tendon, collagen, mechanical properties, maturation, 9
Receptor development, lysosomal apparatus, lysosomal development, phosphomannose receptors, liver development, 149
Redox status, aging, oxidative stress, free radicals, glutathione, insects, 171
Reoxygenation, Langendorff isolated perfused heart, myocardial contracture, iodoacetate, glycogen, aging, 41
Repeated determination, aging, human T lymphocytes mitogenic response, individual variability, 71

Senescence, polyamines, cytokinin, crown gall, nucleaes, 17
Skeletal muscle, aging, motor unit, contractile properties, rat, 243
Small integers, new stochastic human death function, power law, gamma distribution raised to combinatoric power, preliminary studies, 223
Sodium hypophosphite, catalase, antioxidant, ageing, *Zaprionus paravittiger,* 139
Stomach, aldehyde dehydrogenase, isozymes, liver, kidney, ontogeny, mouse, 103
Suppression, natural killer cells, ageing, mice, 57
Surface antigen, T cell, aging, flow cytometry, 89
Synaptonemal complexes, telomeric associations, pachytene, computer analysis, 115

Telomeric associations, synaptonemal complexes, pachytene, computer analysis, 115
Theophylline, age, atherosclerosis, lymphocyte receptors, 1
Tryptophan, aging, enzyme induction, *Aspergilus ornatus, o*-pyrocatechuic acid carboxylyase, 31
T cell, aging, flow cytometry, surface antigen, 89

UV endonuclease-sensitive sites, aging, alkaline elution, chondrocytes, DNA repair, 193

Virus replication and aging, Friend virus, 181

Zaprionus paravittiger, catalase, antioxidant, sodium hypophosphite, ageing, 139
